Annual Report

ANNUAL REPORT

Shreeyam Foundation is Voluntary and 'Not for Profit' organization registered under Indian Trust Act 1882 and engaged with deprived community to uplift their lives through bridging the gap with multidimensional social interventions. This is a young and dynamic organization which has been set up with a team of philanthropists having varieties of innovative ideas to intervene in different segment of development i.e. Education, Women Empowerment, Health Care, Community Development, Vocational Training and Skill Development, Entrepreneurship Development, Social Awareness, Environment and etc. It is working with a team of enthusiastic social volunteers from diversified backgrounds, focusing on eradicating different social eviction.

It intends to work more structured and closely with rural and marginalized communities to bring large results.

It intends to minimise gaps in approach and coordinating between different stakeholders. The team Shreeyam wants to reduce gaps in partnership and collaboration as an important strategy to mitigate such challenges and also for development and to uplift the poor. A strong single platform will provide an opportunity to the stakeholders to share their ideas and approaches to initiate the required interventions with full strength.

Shreeyam believes

“Think not that you are small but that the cosmos is made by the infinite tiny and each one plays their part fully.”

Challenges that continued...

Bihar was a state underdeveloped in many aspects. The facilities and welfare measures available in the state were high in degree. When we had an inclination to work towards people, we realised that Bihar had handicaps on many areas:

1. **Education:** Bihar may be reputed to be one of the states producing a high number of civil servants but availability of educational facilities to the masses was a great challenge.
2. **Health & Sanitation:** level of health facilities and health literacy are correlated and Bihar ranks low in these services. A lot was left to be done in terms of healthcare for the population and hygiene for womenfolk especially during the menstruation periods.
3. **Employment:** lot of youth in the Bihar population were unemployed and had no ability or awareness about how to earn their living and support their family.
4. **Entrepreneurship:** Bihar is famous for its skilled and hardworking people yet the level of knowledge to convert their skills into livelihood was a far cry. The skilled craftsmen do not know how to sell their produce and to whom.

OUR FOCUSED AREA OF INTERVENTION:

- Entrepreneurship Development
- Women Empowerment & Child Development
- Health Care
- Livelihood
- Education
- Training & Skill Development
- Social welfare
- Social Survey and impact assessment
- Social Awareness

Health Camping

We felt that health is a prime concern of people but unfortunately our country is still struggling for a proper healthcare support. Especially the people from underprivileged community have no option to access the present healthcare facility due to poor facilities in govt. hospital and expensive medical test and medicines,

That's why we continuously organizing medical camps for health check-up in association with different doctors and hospitals. Shreeyam Foundation organised health camps for helping the people from underprivileged community for health check-up in association with different doctors and hospitals.

Focus Area	Target Population	No. of people covered	Doctor/Hospital
Health Awareness	Rural Population	200	Asia Hospital

Women empowerment through self-employment

SRIJAN SE SWABLAMBAN TAK (Flagship project for Entrepreneurship Development): This is our flagship project aiming to provide hands on support women & youth of weaker section able to start his own enterprise and converting it in a sustainable model through unique initiative at village level so that their family income can be increased. They conceptualize, they create, they market and they make this sustainable, we guide, we facilitate, we support and we hold their hands to make them stable and minimizing the challenges and risk of failure of their business. This results a sustainable livelihood and a better future as well for them. This is a step towards making woman self-independent.

Focus Area	Target Population	No. of people covered	Location
Self-Employment	Rural women	200	Jalley, Madhubani

Child Education

UNMUKT AANGAN (Primary Education to Slum Kids): we established two primary education centres to provide basic education to such kids of slum who are still not able to get getting proper elementary education through schools and passing their time in playing on road side and streets due to any reason. Even they are not a part of any alternative education system. This aims to provide at least elementary education to them so that they can meet basic requirement of education to make their life smooth in present as well as future scenario.
